February 11, 2021

To SSM Health Leaders:

Rock Trail Coalition is proud to support and partner with the Leadership Development Academy and Team Mission Possible in creating the “Stretch Out the Stress” project for stretching and exercise stations installed along the Ice Age Trail that runs through Janesville.

SSM has designated obesity reduction as one of their main areas of activity in 2021. Team Mission Possible’s project dovetails perfectly with the SSM goals.

Rock Trail Coalition has long worked to develop hiking and biking trails in Rock County and we support others who develop or enhance our wonderful trail system. SSM helped fund the Rock County Health Department and Rock Trail Coalition to develop the Rock County Trail Maps in 2017. That project was part of the obesity reduction initiative also. The “Stretch Out the Stress” project will add another benefit to the trails and contribute even more to the obesity reduction initiative.

Please support the funding of the LDA Team Mission Possible project.

Thank you!
